

Dairygold

Dairygold Co-Operative Society Limited is Ireland's largest farmer owned dairy business and the country's second largest dairy processor. Located in Munster, Dairygold processes c. 960 million litres of milk annually (18% of the Irish Milk pool) from its 3,000 milk suppliers. The Society headquarters is located in Mitchelstown, Co. Cork. Dairygold has manufacturing facilities in Ireland, the UK and France, with sales operations in Germany and Spain. Dairygold currently employs over 1,100 people and generates a turnover of c. 750 million from its worldwide sales.

Scope of work

- Suir is on site in Dairygold Mitchelstown and subsidiary plants in the Munster region since 1984.
- We have carried out multiple electrical, instrumentation and mechanical projects ranging from small works, shut down works to large scale projects.
- In total our turnover for Dairygold alone to date has exceeded €30 million.
- Working for various vendors and directly for the client, Suir Engineering employees have worked in all food manufacturing locations on behalf of Dairygold.
- Examples of vendor packages undertaken by Suir Engineering:
 - Tuchaenhagen
 - GEA
 - Eurodia
 - Tetra Pack
